 Overseas Customers Fax to: **OCEANDRY DRYSUITS:** FAX NO: +64-9-425 7838

Please read these instructions:

It is important to decide what you will normally wear under your Drysuit and then be measured over these clothes.

- 1) **Don't** measure yourself
- 2) **Measure over** clothes to be worn under the Drysuit
- 3) Give **firm tape measurements & don't allow** any extra as we do this.
- 4) **Wear socks** and **remove shoes.**
- 5) Person being measured should **stand normally** with feet slightly apart and **not looking down.**
- 6) **Always use** a cloth tape measure.
- 7) Neck, wrist and forehead measurements **only** are **over bare skin.**
- 8) Around body measurements have **two fingers held flat under tape** (not for wrists & neck).
- 9) Arm length **must be from base of neck & walk the tape down the contour of the shoulder & arm.**
- 10) Make sure clothing & tape measure are **firm into the crotch** for leg length measurements.
- 11) **Height** must be **exact** (in socks).
- 12) **Sketch & send** the feet profiles with socks on and indicate the **foot length** and **width** on the drawings.
